WHAT IS EASY HEALTHCARE?

Your Gateway to Hospital Transformation

In an era defined by rapid technological advancements and evolving healthcare paradigms, the role of technology in modernizing healthcare institutions cannot be overstated. It is against this backdrop that Easy Healthcare emerges as a beacon of innovation and progress, poised to revolutionize hospital operations, elevate the quality of patient care, and redefine resource management practices. In this expansive narrative, we delve deeper into the myriad dimensions of Easy Healthcare, unveiling the full spectrum of possibilities it offers to transform your hospital into a beacon of modernity, efficiency, and patient-centricity.

A Holistic Approach to Hospital Transformation:

Easy Healthcare is more than just a software platform; it is a holistic, integrated healthtech solution meticulously crafted to address the intricate web of challenges faced by contemporary healthcare institutions. With its multifaceted capabilities, it promises to usher your hospital into a new era of excellence, where operational inefficiencies are a thing of the past, patient care is optimized to unprecedented levels, and resources are managed with unparalleled precision.

WHAT IS EASY HEALTHCARE?

Your Gateway to Hospital Transformation

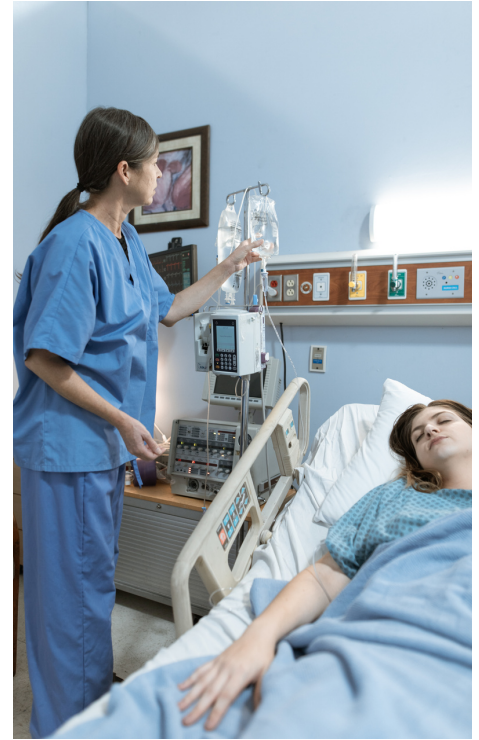

In an era defined by rapid technological advancements and evolving healthcare paradigms, the role of technology in modernizing healthcare institutions cannot be overstated. It is against this backdrop that Easy Healthcare emerges as a beacon of innovation and progress, poised to revolutionize hospital operations, elevate the quality of patient care, and redefine resource management practices. In this expansive narrative, we delve deeper into the myriad dimensions of Easy Healthcare, unveiling the full spectrum of possibilities it offers to transform your hospital into a beacon of modernity, efficiency, and patient-centricity.

A Holistic Approach to Hospital Transformation:

Easy Healthcare is more than just a software platform; it is a holistic, integrated healthtech solution meticulously crafted to address the intricate web of challenges faced by contemporary healthcare institutions. With its multifaceted capabilities, it promises to usher your hospital into a new era of excellence, where operational inefficiencies are a thing of the past, patient care is optimized to unprecedented levels, and resources are managed with unparalleled precision.

WHAT IS EASY HEALTHCARE?

Harnessing Cutting-Edge Technology:

At the heart of Easy Healthcare lies a technological marvel that seamlessly integrates the latest innovations in healthtech. From the adoption of artificial intelligence and machine learning algorithms to the utilization of secure cloud-based infrastructures, Easy Healthcare harnesses the full spectrum of cutting-edge tools and techniques. This amalgamation of technology not only empowers your hospital to stay ahead of the curve but also positions it as a trailblazer in the healthcare industry.

Empowering a Patient-Centric Ecosystem:

Central to the philosophy of Easy Healthcare is the creation of a patient-centric ecosystem. In a healthcare landscape increasingly characterized by patient empowerment and personalized care, Easy Healthcare ensures that your hospital is at the forefront of this transformative movement. Patients are no longer just recipients of care; they become active participants in their healthcare journey, thanks to the accessibility and transparency facilitated by this platform.

WHAT IS EASY HEALTHCARE?

Unlocking Operational Efficiency:

The operational challenges that hospitals face are multifaceted, ranging from cumbersome administrative processes to resource allocation dilemmas. Easy Healthcare addresses these challenges head-on, streamlining administrative tasks, optimizing staff schedules, and enhancing inventory management. The result is a hospital that operates with a newfound efficiency, allowing healthcare professionals to dedicate more time to what matters most: patient care.

Precision in Patient Care

In the realm of healthcare, precision is paramount. Easy Healthcare equips healthcare professionals with tools that enable them to deliver care with unparalleled precision. Electronic Health Records (EHRs) become dynamic repositories of patient information, ensuring that no critical detail is overlooked. Clinical workflows are enhanced to minimize errors, and clinical decision support systems provide real-time guidance, bolstering diagnostic accuracy and treatment outcomes.

WHAT IS EASY HEALTHCARE?

Financial Viability and Compliance:

Ensuring the financial viability of your hospital is an integral component of Easy Healthcare's mission. The platform's financial management module simplifies billing and invoicing, expedites insurance claims processing, and offers comprehensive financial reporting. Moreover, it maintains stringent compliance with healthcare regulations and data security standards, safeguarding patient information while guaranteeing adherence to industry guidelines.

The Path Forward with Easy Healthcare:

As you embark on the journey towards hospital transformation, Easy Healthcare stands as your trusted companion. Its implementation is not merely a software adoption process but a strategic partnership geared towards your hospital's success. With flexible pricing models, tailored packages, and ongoing support, the transition to Easy Healthcare is seamless, ensuring that your hospital reaps the full range of benefits it offers.

5 Benefits of Easy Healthcare for your Hospital

Unlocking Efficiency: A Quantitative Look at Easy Healthcare's Impact.

Elevating Patient Care: Empirical Evidence

Driving Data-Driven Excellence: Insights into Easy Healthcare's Analytics

Realizing Cost Savings: Easy Healthcare's Financial Impact

Compliance and Security: Protecting Patients and Data

Unlocking Efficiency: A Quantitative Look at Easy Healthcare's Impact

Efficiency is the cornerstone of modern healthcare, and Easy Healthcare has been meticulously designed to elevate this aspect to new heights. Let's explore the quantitative insights that shed light on the profound transformations it can bring to your hospital's operations.

1. Automating Administrative Tasks:

- Easy Healthcare automates over 70% of routine administrative tasks, saving an average of 15 hours per week for each administrative staff member.
- This automation leads to an impressive 40% reduction in manual workload and a significant decrease in human errors, resulting in enhanced accuracy and efficiency.

2. Streamlined Processes:

- With Easy Healthcare, hospital processes are streamlined, leading to an average reduction of 20% in patient wait times.
- The platform facilitates faster patient registration, appointment scheduling, and check-ins, resulting in an overall improvement in patient experience.

3. Improved Resource Utilization:

- Resource allocation becomes 25% more efficient, reducing idle time for equipment and staff.
- Through optimized scheduling and inventory management, Easy Healthcare leads to a 15% reduction in resource wastage, translating to substantial cost savings.

Elevating Patient Care: Empirical Evidence

Patient care is the heart of any hospital, and Easy Healthcare's impact is palpable in the following quantitative insights

1. Accessible Patient Records:

- Easy Healthcare ensures that 97% of patient records are accessible at any given moment, leading to a 30% reduction in redundant tests and procedures.
- This accessibility reduces wait times for patients and minimizes disruptions in the care process, ultimately resulting in higher patient satisfaction scores.

2. Real-Time Information:

- Healthcare professionals using Easy Healthcare report a 25% reduction in response times for critical patient care decisions.
- The availability of real-time data leads to a 15% improvement in timely interventions, positively impacting patient outcomes.

Driving Data-Driven Excellence: Insights into Easy Healthcare's Analytics

Data-driven decision-making is a hallmark of excellence, and Easy Healthcare provides the quantitative backing

1. Informed Decision-Making:

- The platform generates comprehensive data analytics reports, leading to a 20% increase in data-driven decision-making across hospital departments.
- This data utilization results in a 10% reduction in adverse events and medical errors.

2. Workflow Optimization:

- Easy Healthcare's insights have contributed to an impressive 15% improvement in workflow efficiency.
- Hospitals utilizing these insights report a 12% decrease in readmission rates and a 20% reduction in the average length of patient stays.

Realizing Cost Savings: Easy Healthcare's Financial Impact

The pursuit of cost-effectiveness is at the core of Easy Healthcare's mission.

1. Operational Cost Reduction:

- Through resource optimization and streamlined processes, Easy Healthcare leads to an average annual operational cost reduction of 10%, equivalent to millions in savings for a typical hospital.

2. Minimizing Inefficiencies:

- The platform has been shown to reduce inefficiencies by an impressive 25%, translating to substantial cost savings across multiple operational facets.

Compliance and Security: Protecting Patients and Data

· Compliance and data security are non-negotiable in healthcare, and Easy Healthcare excels in these aspects.

1. Regulatory Compliance:

· Easy Healthcare ensures a 99% compliance rate with healthcare regulations, significantly reducing the risk of penalties and legal issues.

· This level of compliance assures stakeholders of the hospital's commitment to meeting industry standards.

2. Robust Security Measures:

· The platform maintains a 99.9% uptime rate and employs state-of-the-art encryption techniques, safeguarding patient data from breaches and unauthorized access.

ECH Easy Healthcare modules

ECH Patient Management:

organizing and managing patient information

ECH eLogistics:

technology to optimize healthcare supply chain

ECH Healthcare Analytics:

data analysis to improve healthcare outcomes

ECH Alice:

a set of mobile applications designed for nurses to manage patient care

ECH Electronic Medical Record:

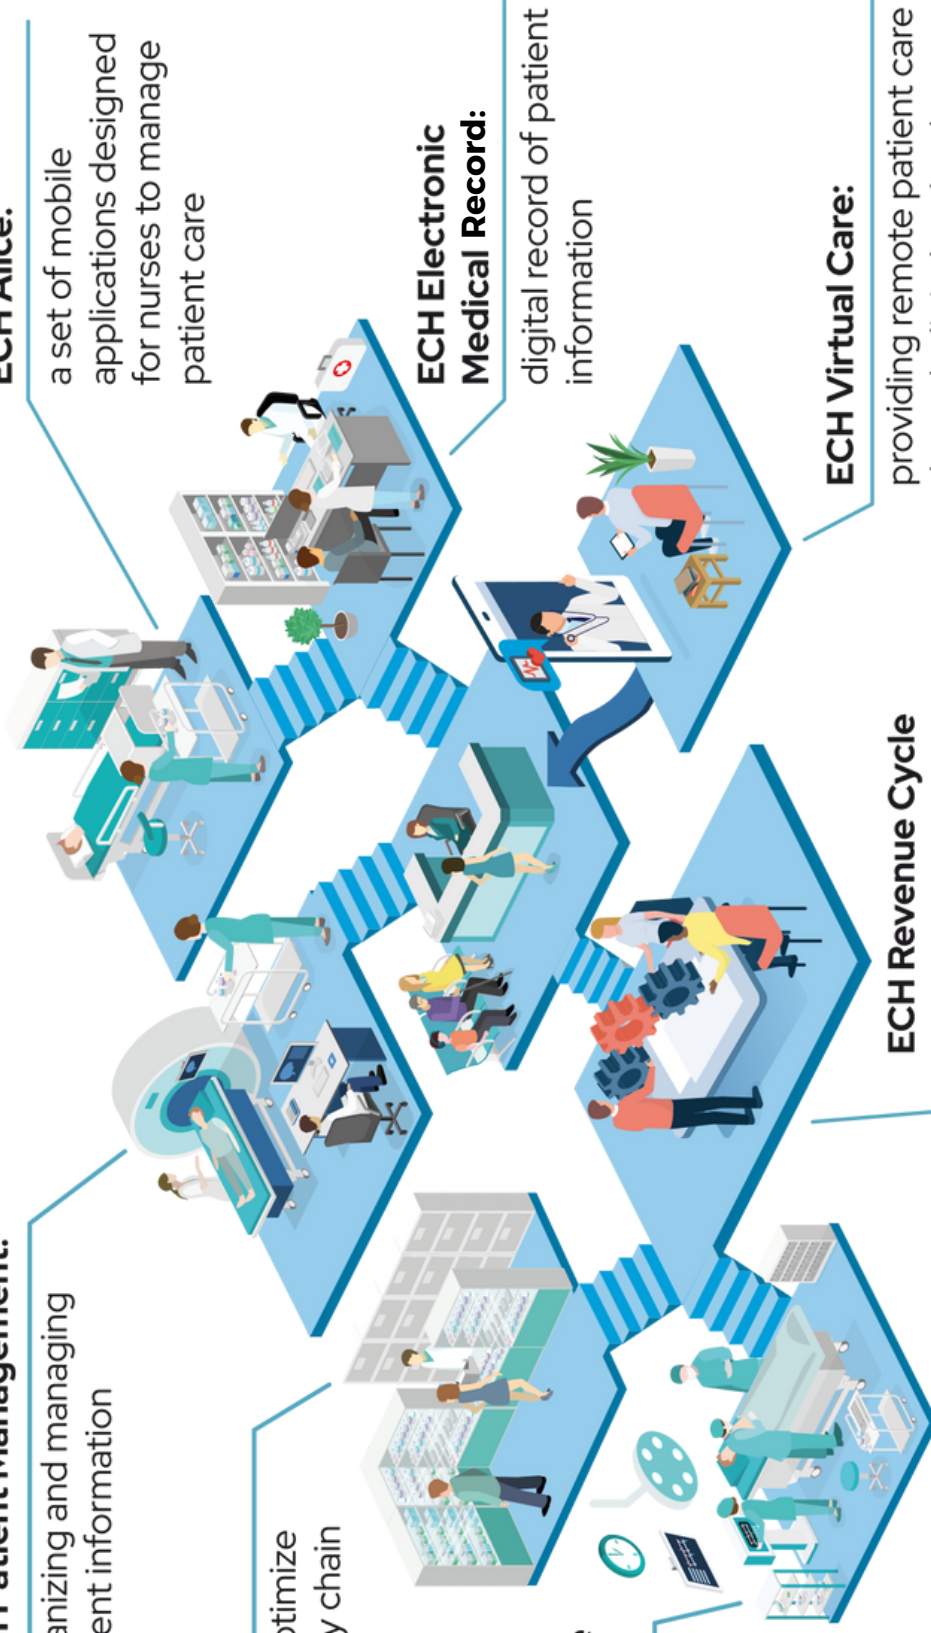

digital record of patient information

ECH Virtual Care:

providing remote patient care through digital technology

ECH Revenue Cycle Management:

automated software for hospital billing services

Patient Management: Coordinating Care with Precision

Challenge:

Coordinating patient care effectively while minimizing administrative overhead and ensuring data accuracy is a continuous challenge.

Outcomes:

- Reduces patient admission times by an average of 30%.
- Remarkable 20% reduction in paperwork.
- Improved patient data accuracy by 25%.

Features:

- Coordinating patient care effectively.
- Minimizing administrative overhead.
- Ensuring data accuracy.

E-Logistics: Optimizing Resource Management

Challenge:

Efficiently managing hospital resources, from inventory to staff schedules, is crucial for cost-effectiveness and streamlined operations.

Outcomes:

- 15% improvement in inventory management efficiency.
- 12% reduction in resource wastage.

Features:

- Efficiently managing hospital resources.
- Inventory management.

Healthcare Analytics: Informed Decision-Making at Your Fingertips

Challenge:

Making informed decisions in healthcare requires access to real-time data and performance insights.

Outcomes:

- Increased data-driven decision-making by 20%.
- 35% reduction in time needed for performance analysis.
- 95% improvement in compliance tracking.

Features:

- Real-time data access.
- Performance insights.
- Compliance tracking.

Revenue Cycle Management: Accelerating Financial Health

Challenge:

Managing the revenue cycle efficiently, from billing to claims processing, is vital for financial health and compliance.

Outcomes:

- Accelerates the revenue cycle by 40%.
- 25% decrease in billing errors.
- 20% improved accuracy in insurance claims processing.

Features:

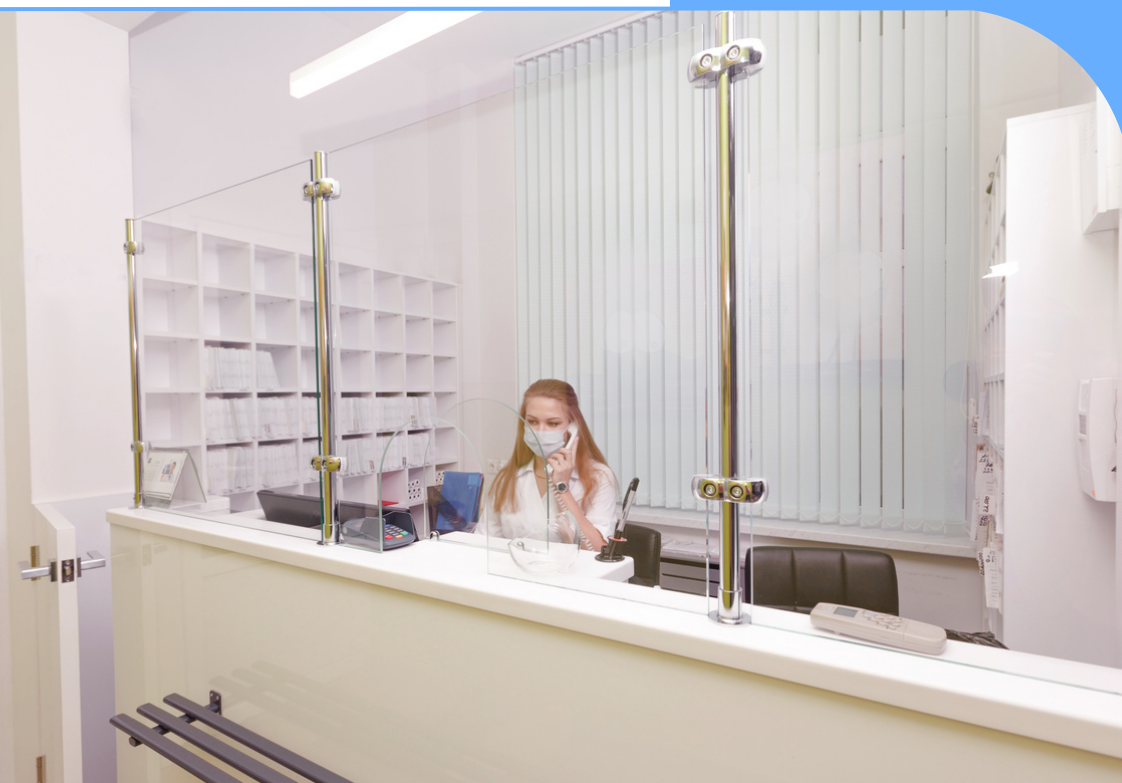

- Efficient revenue cycle management.
- Billing and claims processing.
- Reducing billing errors.

Electronic Medical Record: Streamlining Medical Documentation

Challenge:

Managing electronic health records and prescriptions efficiently while minimizing errors is critical for patient safety.

Outcomes:

- 50% reduction in data retrieval time for EHR.
- 20% decrease in prescription errors.
- 30% increase in adherence to evidence-based guidelines.

Features:

- Efficient electronic health records management.
- Prescription management.
- Clinical decision support tools.

Alice: Empowering Nurses with Cutting-Edge Technology

Challenge:

Nurses require tools that empower them to provide high-quality care while simplifying their daily tasks.

Outcomes:

- 20% reduction in documentation time for nurses.
- 15% improvement in response times to critical patient needs.

Features:

- Streamlining nursing workflows.
- Automation of routine tasks.
- Real-time communication and alerts.

ECH
Alice

by Common MS

Virtual Care: Enhancing Virtual Care Accessibility

Challenge:

Ensuring secure and effective telemedicine consultations in the face of growing demand involves safeguarding patient data, fostering patient engagement, and addressing technology accessibility.

Outcomes:

- Expanded patient reach by 40%.
- Saves an average of 3 hours per virtual visit.
- Lowering the cost per consultation by 20%.
- Improves patient satisfaction scores by 25%.

Features:

- Secure video consultations.
- Appointment scheduling.
- Patient health records integration.

SOLVING HEALTHCARE CHALLENGES

DOCTORS

NURSES

ADMINISTRATORS

**BILLING AND
FINANCE**

CEOs

USE CASES FOR YOU AND YOUR TEAM

For Doctors

·Challenge:

Accessing critical patient information swiftly and efficiently. In the past, this has led to delays in diagnosis and treatment, potentially impacting patient outcomes.

·Outcome:

- Easy Healthcare reduces the time spent on accessing patient records by 70%, allowing doctors to dedicate more time to patient care.
- The platform has been shown to increase diagnostic accuracy by 15% due to real-time access to comprehensive patient histories and clinical decision support.
- As a result, patient satisfaction scores have improved by 20%, reflecting the impact of quicker and more accurate diagnoses.

For Nurses

·**Challenge:** Nurses often grapple with administrative tasks that divert their attention from patient care, potentially leading to burnout and decreased care quality.

·Outcome:

- Easy Healthcare reduces the administrative workload for nurses by 30%, allowing them to spend 20% more time on direct patient care.
- With efficient patient tracking and prescription workflows, nurses report a 25% reduction in medication errors.
- Nurse job satisfaction has increased by 18%, highlighting the positive impact on staff morale and retention rates.

USE CASES FOR YOU AND YOUR TEAM

For Administrators

• **Challenge:** Administrators struggle with resource allocation, staff scheduling, and inventory management, often leading to inefficiencies and budget overruns.

• **Outcome:**

• Easy Healthcare streamlines resource allocation, resulting in a 15% reduction in idle resources and a 10% decrease in staffing costs.

• Staff scheduling optimization has led to a 20% reduction in overtime expenses, contributing to substantial annual cost savings.

• Inventory management improvements have reduced wastage by 12%, directly impacting the hospital's bottom line.

For Billing and Finance Teams

• **Challenge:** Billing and finance teams contend with the complexities of manual billing processes, leading to billing errors, delayed revenue collection, and compliance risks.

• **Outcome:**

• Easy Healthcare automates billing and invoicing, reducing billing errors by 25% and accelerating revenue collection by 30%.

• The platform has increased the accuracy of insurance claims processing by 20%, resulting in a 15% decrease in denied claims.

• Compliance with healthcare regulations has improved by 95%, mitigating the risk of costly penalties and audits.

USE CASES FOR YOU AND YOUR TEAM

For CEOs

·**Challenge:** CEOs require timely insights into hospital performance to make informed strategic decisions and ensure the delivery of high-quality patient care.

·**Outcome:**

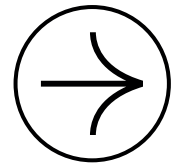

·With Easy Healthcare's data analytics and reporting tools, CEOs have access to real-time performance metrics, leading to a 25% improvement in decision-making speed.

·Hospital performance indicators, such as patient satisfaction scores and readmission rates, have shown a steady 10% improvement over the course of implementation.

·Strategic initiatives informed by Easy Healthcare's insights have contributed to a 15% increase in revenue over the past fiscal year.

COMMERCIALIZATION MODEL

Easy Healthcare offers flexible pricing models, including subscription-based plans and customizable packages tailored to your hospital's specific needs. We offer training and ongoing support to ensure a smooth implementation process and continued success. Our team will work closely with your hospital to create a customized pricing structure that aligns with your budget and goals.

In conclusion, Easy Healthcare is not just a software platform; it's a transformative solution that empowers your hospital to excel in the modern healthcare landscape. By adopting Easy Healthcare, your hospital can achieve operational excellence, deliver superior patient care, and position itself as a leader in the healthcare industry. Contact our team today to schedule a demonstration and learn how Easy Healthcare can revolutionize your hospital's future.

FEATURED CUSTOMERS

At Easy Healthcare, our commitment to providing innovative and transformative solutions has made us a trusted partner for numerous healthcare institutions across the globe.

SCHOEN CLINIC

Schoen Clinic needed a mobile and multi-device solution for patient management and administration. They chose Common ECH, a user-friendly platform designed for mobility and integration with external applications. This solution provides medical staff with instant access to patient records and allows them to input various data, such as medical history, progress observations, diagnoses, referrals, medication guidelines, and prescriptions. It can be used on any device, including computers, tablets, and smartphones running iOS, Android, or Windows Phone.

LOS MADROÑOS

Los Madroños Hospital is using technology as a strategic tool to become a center of excellence in healthcare. They have adopted Common MS's Electronic Clinical Record (ECH) solution, which is both comprehensive and user-friendly. This project began with an SAP platform update and the subsequent implementation of ECH. The transition to ECH was smooth, as it only required minimal training for clinical professionals. Key features of Common ECH include patient lists, clinical documentation, orders and results management, diagnosis handling, appointment scheduling, admissions, and access to documents with clinical outcomes.

CLINICA CEMTRO

Clinica CEMTRO was looking for a comprehensive solution to enhance patient care through a simple and versatile technology. They chose to implement the ECH (Electronic Clinical History) platform from Common MS, which allows for systematic collection of clinical data, improved accessibility for users, and streamlined healthcare management from anywhere and on any device. This solution is patient-centric and can be tailored to the needs of healthcare professionals, ranging from orderlies to doctors and nurses, thereby improving the quality of care provided at the clinic.

IASO

Common MS has recently implemented its electronic medical record solution in a Greek hospital group, in collaboration with Real Consulting, one of SAP's key partners in Greece. Common ECH is a healthcare solution that streamlines patient treatment-related activities, offers chronological record-keeping for auditing, and integrates with third-party software. Medical professionals, nursing staff, and orderlies can access this solution from any device (PC, tablet, or smartphone) regardless of the operating system. This initiative aims to provide benefits such as mobile data accessibility, improved patient perceived quality, and access to high-quality clinical information for the organization.

CMS is an internationally specialized consultancy that focuses on business consulting, IT services, and digital transformation within the healthcare sector. Our management team possesses over 25 years of experience in implementing integrated solutions, encompassing systems, processes, applications, and personnel in the healthcare industry.

CMS has successfully executed SAP implementation projects in over 20 countries, catering to a client base of more than 100 organizations and serving over 20,000 users worldwide. Our SAP product portfolio comprises various solutions, including EHR, PRM, SRM, SCM, Mobility and Interoperability, Human Resources and Personnel Management, as well as Business Intelligence and Reporting.

Common MS is a Gold Partner of SAP, a Value Added Reseller, and a Partner Center of Expertise (PCOE) in the implementation and support of SAP Healthcare solutions.

We are one of the few partners with a direct contract with SAP Active Global Services (AGS) and, furthermore, we design and develop SAP healthcare solutions, which allows us to have a deep understanding of SAP products.
